

BRADY.

The global number 1 software vendor for metals

Proven and trusted

Over 30 years' experience in metals. Our customers include major global players across the metals space, from start-ups to large multinational organisations.

The most comprehensive metals solution

Supports end-to-end financial and physical trading needs, across all metals - raw materials and concentrates to refined products.

Supports all trading lifecycle processes including; deal capture, hedging, real-time risk management, positions, allocations, aggregations, P&L, inventory, shipping, logistics, settlements and accounting.

Wide contract coverage

Standard financial contracts including forwards, futures, options and averages to complex derivative instruments. Supports trading on metals exchanges including LME-specific requirements and OTC trades.

Flexible

Select modules tailored to your business needs to work with your existing IT environment.
Deploy on premise or via the cloud.
Scale as your business grows to new markets and commodities.
Select our pre-configured 'quick-start' deployment package and you can be operational in weeks.

Your business benefits

- **Identify profitable trading opportunities** with a single view of your entire trading operation.
- **Protect profit margins** by measuring market, credit and liquidity risks in real-time and undertaking advanced P&L analysis.
- **Lower cost of trade processing** with automated workflow facilitating improved communications between your front, middle and back office.
- **Control costs across physical operations** in key areas including estimation to realisation of freight, insurance, inventory and storage with a single view across different locations.
- **Provide transparency and reduce operational risk.** Perform audits not possible with spreadsheets to meet regulatory compliance.
